

Critical Thinking Rubric
Weight of assessment in final grade: 20%
Type of assessment: individual
Evaluator: Hegias

	Learning Outcome (numbers based on overall outcomes)	Criteria	Fail	Pass	Comments
Communicate	1.e. Apply interview and listening strategies.	Describe experiences with / thoughts on: - clear and open questions (e.g., with the technique of non-directive questioning) - reflective listening (based on the LISTEN approach) - adapting to the context of the interview	No or hardly any reflection on interview and listening skills is provided	Experiences with interviewing or listening skills are included and elaborated on	
Collaborate	2.a. Collaborate effectively with other group members, other groups and the case owners / experts of the field.	- The students' role(s) in the assignments (poster, proposal) - The interaction with the supervisor(s) and coach(es) - The interaction with stakeholders	The critical thinking journal lacks reflection on any of the following points: - The students' role(s) in the assignments (poster, proposal) - The interaction with the supervisor(s) and coach(es) - The interaction with other stakeholders Or the reflection is superficial and only scratches the surface.	The critical thinking journal contains detailed reflections on all the following points: - The students' role(s) in the assignments (poster, proposal) - The interaction with the supervisor(s) and coach(es) - The interaction with other stakeholders	
	2.b. Explain how intercultural differences play a role in collaboration—this includes social (language, nationality, etc.) but also professional (business vs education, medicine vs engineering) differences and apply this knowledge to the collaboration.	- The first part of the team contract (the student's knowledge, skills, methods and values added to the team) - What did the student learn from other team members / other teams / supervisors / coaches	The critical thinking journal lacks reflection on any of the following points: - the student's knowledge, skills, methods and values added to the team, - What did the student learn from other team members / other teams / supervisors / coaches Or the reflection is superficial and only scratches the surface.	The critical thinking journal contains detailed reflections on the following points: - the student's knowledge, skills, methods and values added to the team, especially in the light of the others' knowledge, skills, methods and values. - What did the student learn from other team members / other teams / supervisors / coaches	
	2.c. Be aware of and reflect on the various phases of the process, the challenges and problems that were encountered, and what was learned from this.	- Challenges the team encountered - How they solved these - What did they learn from these	The critical thinking journal lacks reflection on any of the following points: - Challenges the team encountered - How they solved these - What did they learn from these Or the reflection is superficial and only scratches the surface.	The critical thinking journal contains detailed reflections on all the following points: - Challenges the team encountered - How they solved these - What did they learn from these	
	2.d. Evaluate different roles at individual and team level in project groups.	- The way the team worked together (collaboration, cooperation or coordination) - The role(s) of the student in the team - The Belbin role of the student and their	The critical thinking journal lacks reflection on any of the following points: - The way the team worked together (collaboration, cooperation or coordination) - The role(s) of the student in the team	The critical thinking journal contains detailed reflections on all the following points: - The way the team worked together (collaboration, cooperation or coordination) - The role(s) of the student in the team	

		reflection on this role	- The Belbin role of the student and their reflection on this role Or the reflection is superficial and only scratches the surface.	- The Belbin role of the student and their reflection on this role	
	2.e. Provide constructive feedback and show openness to feedback from others.	Reflection contains: - The ways the student gave and received feedback from peers	The critical thinking journal lacks reflection on any of the following points: - The ways the student gave and received feedback from peers and what they did with the feedback Or the reflection is superficial and only scratches the surface.	The critical thinking journal contains detailed reflections on all the following points: - The ways the student gave and received feedback from peers and what they did with the feedback	
Research	3.c. Develop a helicopter view of a research topic — and understand the information in different contexts, magnitude and connections.	Research insight	Lacks a comprehensive understanding of the research topic. Fails to critically think about relevant sources or incorporate them effectively.	Has a comprehensive understanding of the weekly topic and can identify strenghts and weaknesses of relevant sources and context in general.	
	3.d. Understand the dot on the horizon-- Identify interesting/solvable problems, long term possibility and challenges of a research topic.	Problem identification	Struggles with identifying problems, lacks long-term vision, and does not reflect on scientific challenges	Identifies problems, has long-term vision, and reflects on scientific challenges.	
Reflect	4.a. Use provided frameworks to reflect on experiences in the minor.	Describe what experiences and insights you obtained from the reflection workshops.	No or hardly any reflection is provided on the experiences in the minor.	Reflection on experiences in the minor are provided. It is clearly indicated what has been learned from the experiences obtained in the minor.	
	4.b. Ask for constructive feedback of supervisors.	Feedback is requested from the supervisor. The student shows an open attitude towards receiving the feedback.	No or hardly any feedback is requested from the supervisors	Constructive feedback is requested from the supervisor. The student shows an open attitude towards receiving feedback.	
	4.c. Understand how personal biases influence work.	Describe what personal and cultural preferences influence the work in the minor.	No or hardly any reflection is provided on the personal and cultural preferences of the student.	Personal and cultural preferences can be formulated and expressed in the context of the individual work and team contribution of the student
