

Q1 Proposal Rubric

Weight of assessment in final grade: 30%

Type of assessment: group

Evaluator: Supervisors

	Learning Outcome (numbers based on overall outcomes)	Criteria	4-5 Insufficient	6 Sufficient	7-8 Good	9-10 Excellent	Comments
Communicate	1.d. Write an effective research proposal to communicate their research plan.	Abstract	The abstract is not clear, even after reading the rest of the proposal or the abstract misses one or more key elements of the proposal	The abstract contains all key elements and can be understood without reading the rest of the proposal, but this requires some effort, or some key aspects are unclear	The abstract can be easily understood without reading the rest of the proposal and clearly summarizes all key points	The abstract is a convincing and easy to read summary of the proposal, properly highlighting all its key elements	
		Key elements	Title, main question, method, and impact are not present or unclear, or the background/ knowledge gap section does not support the main question or is unclear	The main question/aim is clear but some aspects have not been introduced in the background section, and/or the title is unclear, and/or the proposed method and impact is not clearly described	The proposal title is clear, the main question and knowledge gap are clear and properly introduced in the background section. Background section, method, and impact are all clearly described, but could have been more to the point or more convincing.	The proposal title, main question, background, method, and impact are fully clear and convincingly described. Attention is drawn to potential innovative aspects or valuable contributions of the research. Could form (part of) a true grant application.	
		Proposal	Paragraphs appear	Proposal is	Very clearly	The whole proposal	

		structure, storyline, and argumentation	disconnected, and/or subheadings are missing or unclear, and/or use of figures/tables is incorrect or unclear, and/or claims are unsupported	structured but the order of some items could have been more optimal; not all paragraphs have clear topic sentences and/or some paragraphs appear disconnected, some subheadings are not informative (enough), use of some figures can be improved. Occasionally, information is not well supported.	structured with appropriate subheadings and pleasant overall layout. Paragraphs are well-connected and have clear topic sentences. Figures are clear and consistent. Claims are well supported. Some minor aspects could still be improved.	is optimally structured. Storyline is clearly articulated by effective paragraph use. Figures are well integrated into the text. Claims are well supported, and choices are well argued for. Could form (part of) a true grant application	
		Language and style	Difficult to follow because of language/grammatical errors and poor style (language lacks conciseness and clarity).	Grammar and spelling are sufficient; a few errors may occur. Content is comprehensible but readability issues may occur.	Overall correct grammar and spelling. Clear and precise academic style, concise and easily readable.	Flawless grammar and spelling, no editing required. Convincing, clear, and attractive language and style, easy to read.	
Collaborate	2.e. Provide constructive feedback and show openness to feedback from	Providing feedback to the other teams on their	The feedback is not related to the content or the format of the proposal.	The feedback is brief, but it is based on the Proposal rubrics' elements related to	The feedback is based on the Proposal rubrics' elements related to communication and	The detailed feedback is based on the Proposal rubrics' elements related to	

	others.	proposal based on the rubric		communication and research.	research, it mentions positive and negative aspects of the proposal.	communication and research, it mentions positive and negative aspects of the proposal and it is constructive, suggesting solutions to make the other team's proposal better.	
Research	3.b. Formulate an adequate research question.	Research question formulation	The question is unclear formulated, overly broad, or not effectively addressing the research topic.	The question may require further refinement to effectively address the research topic.	The question is relevant to the research topic and demonstrates an understanding of the research area.	The question is highly specific, relevant, and shows a deep understanding of the research area.	
	3.d. Understand the dot on the horizon- -Identify interesting/solvable problems, long term possibility and challenges of a research topic.	Long-term vision	Struggles with identifying problems, proposal lacks long-term vision	Proposal demonstrates a partial long-term vision but needs further development. Proposal identifies scientific challenges to some extent, but improvement is needed.	Proposal demonstrates a clear long-term vision.	Proposal demonstrates a clear long-term vision, and scientific challenges are identified, contributing to a well-rounded perspective	
	3.f. Write an insightful summary of research done with social implications.	Summary	Summary lacks depth and overlooks social implications in research.	Basic summary but lacks depth. Summary demonstrates some awareness of social implications but does not delve into them sufficiently.	Summary is clear and well-structured, and offers insights into the social implications of the research.	An exceptionally insightful and comprehensive summary, and demonstrates a profound understanding of the research's social	

						implications and their significance.	
	3.g. Write a short research proposal with background, knowledge gap, approach and impact section.	Different parts of the proposal	Fails to include essential sections in the proposal. Proposal lacks coherence and structure.	Proposal includes the required sections but with limited detail. The proposal lacks depth and clarity in some sections.	A clear and well-structured proposal with all necessary sections.	Provides an exceptionally well-crafted proposal. Each section is highly detailed and well-elaborated.	
	3.h. Understand the resources for projects that are available and their costs.	Resources and costs	Limited understanding of project resources and their costs, with significant omissions and inaccuracies. Fails to recognize key resources.	Partial understanding of project resources, with some omissions and inaccuracies. Recognizes some key resources but lacks completeness.	Effective understanding of project resources and their costs, with few omissions and inaccuracies. Demonstrates a clear understanding of the financial aspects of resources.	Exceptional understanding of project resources and their costs, showcasing a comprehensive identification of all relevant resources and precise cost considerations. Provides insightful perspectives on resource allocation.	
Reflect	4.b. Ask for constructive feedback of supervisors.	Feedback	FAIL: Student has not or too late consulted the supervisor; suggestions are not taken into considerations.		PASS: Student has consulted the supervisor and/or peers to obtain feedback on the proposal, suggestions are taken into consideration.
