

Poster Rubric

Weight of assessment in final grade: 20%

Type of assessment: group

Evaluator: Supervisors, thread leaders

	Learning Outcome (numbers based on overall outcomes)	Criteria	4-5 Insufficient	6 Sufficient	7-8 Good	9-10 Excellent	Comments
Communicate	1.a. Create an effective poster (e.g., with a clear structure and visuals)	Key elements: presence and structure	The poster presentation does not contain key elements to communicate the proposal	The elements of the research proposal are present, but some connections/transitions may be unclear	Clear connections and transitions between key elements of the proposal	Clear organization of key elements; Narrative from motive to objective (relevance, gap and aim) are very clear	
		Use of visuals	Visuals (figures/tables) are of insufficient quality (e.g., because they are illegible, not stand-alone comprehensible, or irrelevant)	Visuals are of decent quality (referred to and stand-alone readable); some minor issues may occur	Visuals are of good quality: they are supportive of content, referred to and stand-alone readable	All visuals are of high quality; visuals are used to support the storyline with out excess.	
	1.b. Effectively deliver a poster presentation at a research symposium for a mixed audience (peers, stakeholders and non-academics).	Audience analysis	The poster presentation is not understandable (e.g., relevance of topic is unclear, or jargon is used without explanation)	The poster presentation is largely understandable; but some key terms or topics are insufficiently explained or only geared to a specific audience	The poster presentation is entirely understandable for various audiences	The poster presentation is entirely understandable <i>and</i> attractive for various audiences; e.g., because of a narrative and examples that the target audience can relate to.	
		Delivery skills (individual evaluation)	Speaker does not establish contact with the audience (e.g., no eye contact, clarity issues due to volume or high pace, no active posture, or gestures)	Speaker occasionally lacks eye contact, clarity (regarding pace or articulation), or an active posture and gestures	Speaker displays engaging delivery skills (regular eye contact, good pace, varied intonation, active posture and supporting gestures) but with minor inconsistencies	Speaker consistently displays engaging delivery skills, to emphasize content and storyline	
		Interaction with the audience (group)	Speakers do not attempt to actively involve the audience, and/or do not demonstrate listening skills, and/or do not handle questions effectively	Speakers occasionally involve the audience and display active listening skills, or do not effectively answer questions	Speakers regularly involve the audience, show active listening skills, and handle questions effectively	Speakers connect and interact with the audience, Speakers show to be comfortable with the situation (e.g., by using the space or responding to unexpected/challenging situations)	
	2.f. Provide constructive feedback and show openness to feedback from others. (to be filled by Thread Leader or Programme Director, not Supervisor)	Providing feedback to the other teams on their presentation based on the rubric	The feedback is not related to the content or the format of the poster.	The feedback is brief, but it is based on the Poster rubrics' elements related to communication and research.	The detailed feedback is based on the Poster rubrics' elements related to communication and research, it mentions positive and negative aspects of the poster.	The detailed feedback is based on the Poster rubrics' elements related to communication and research, it mentions positive and negative aspects of the poster and it is constructive, suggesting solutions to make the other team's poster presentation better.	(to be filled by Thread Leader or Programme Director, not Supervisor)
Research	3.a. Able to identify, analyse and integrate current knowledge about a topic from multiple sources, perspectives and methodologies, and identify knowledge gaps.	Understanding the knowledge	Poster does not display integration of knowledge from various sources, perspectives, and methodologies.	Poster combines knowledge from multiple sources and perspectives but lacks depth and sophistication.	Poster demonstrates in-depth integration and analysis from various sources, perspectives, and methodologies.	Poster excels in integration and knowledge analysis, showcasing a deep understanding of the topic while showing the limitation of their knowledge too.	
	3.b. Formulate an adequate research question and relevant research strategy to address it.	Research question	Demonstrates a limited ability to describe their research proposal. The research strategy is incomplete, inappropriate, or poorly structured, showing limited understanding of research design.	Partially formulates a research question, but is unable to explain it clearly. The question may need further refinement to effectively address the research topic. The research strategy is simplistic.	Clear and focused research question that is relevant and shows good understanding of the topic, supported by an appropriate, coherent, and well-developed research strategy.	Formulate an exceptional research question and strategy: highly specific, relevant, and clearly formulated, with a well-aligned, feasible approach, showing clear understanding of required steps, tools, and ethical considerations.	
Reflection	4.c. Ask for constructive feedback from supervisors.	Feedback for poster	FAIL: Student does not actively ask for feedback on either the content	PASS: Student asks for feedback on the poster and acts on it.			

			or lay out of the poster.
