

Q2 Presentation Rubric

Weight of assessment in final grade: 20%

Type of assessment: group

Evaluator: Supervisors, thread leaders

	Learning Outcome (numbers based on overall outcomes)	Criteria	4-5 Insufficient	6 Sufficient	7-8 Good	9-10 Excellent	Comments
Communicate	1.a. Adapt a research presentation to various audiences (peers, stakeholders and non-academics).	Audience analysis and adaptability	The presentation is not properly understandable for various audiences; e.g., because: - Jargon / technical terms are not explained - The presentation does not make clear how the research topic is relevant to stakeholders or a non-academic audience	The presentation is largely understandable to various audiences; e.g., because: - Key technical terms or concepts are explained, but not always clearly enough - Relevance of the topic is presented, but not clearly related to peers, stakeholders, or non-academics	The presentation is entirely understandable for various audiences; e.g., because: - Key terms or concepts are all clearly explained - Relevance of the topic is addressed and clearly related to peers, stakeholders, or non-academics (e.g., by using a concrete example or accounting for research choices made)	The presentation is entirely understandable <i>and</i> attractive for various audiences; e.g., because: - Speakers apply an engaging narrative to explain the relevance of the topic - Speaker actively gears examples and explanations to audiences (e.g., specific stakeholders)	
	b. Create an effective research presentation (e.g., with a clear structure and visuals)	Storyline and structure	The presentation does not have a clear storyline, and / or conclusions do not correspond to the aim, and/or key elements from the research project are missing	The presentation contains a clear storyline; conclusions correspond to the aim Narrative can be more attractive (e.g. by starting with an engaging attention grabber) Clear organization of key points, some connections/transitions may be unclear	The presentation contains a clear storyline; key points are clearly related to the presentation aim Presentation contains attractive narrative elements (e.g., an engaging attention grabber and final sentence) Clear organization of key points; connections and transitions between elements are clear	The presentation contains a clear storyline; key points are clearly related to the presentation aim Attention of the audience is drawn throughout the presentation by an engaging narrative Well-crafted storyline; argumentative moves between key points are emphasized via varied transitions	
		Use of visuals	Visuals (figures/tables) are of insufficient quality, e.g., because they are - illegible - not stand-alone comprehensible, - irrelevant to the topic	Visuals are of decent quality (referred to and stand-alone readable); some minor issues may occur	Visuals are of good quality: they are supportive of content, referred to and stand-alone readable	All visuals are of high quality; attention of the audience is drawn to important visual elements (e.g., via colours or arrows), complex visuals are built up step by step, and visuals are used to support the storyline	
	d. Effectively deliver a presentation at a symposium	Delivery skills (individual evaluation)	Speaker does not establish contact with the audience (e.g., no eye contact, clarity issues due to volume or high pace, no active posture, or gestures)	Speaker regularly displays delivery skills to establish contact with the audience, but occasionally lacks eye contact, clarity (regarding pace or articulation), or an active posture and gestures	Speaker displays engaging delivery skills (regular eye contact, good pace, varied intonation, active posture and supporting gestures) but with minor inconsistencies	Speaker consistently displays engaging delivery skills, and can adapt delivery skills to the content and storyline	
		Interaction with the audience (group)	Speakers do not attempt to actively involve the audience, and/or do not demonstrate listening skills, and/or do not handle questions effectively	Speakers attempt to establish a connection with the audience, but involve the audience inconsistently, show some gaps in active listening skills, or occasionally do not effectively answer questions	Speakers establish a connection with the audience, regularly involve the audience, show active listening skills, and handle questions effectively	Speakers actively establish a successful connection with the audience and consistently interact with the audience by showing active listening skills and effective handling of questions	

						Speakers show to be in control of the situation (e.g., by strategically choosing position or responding to unexpected / challenging situations)	
Collaborate	2.e. Provide constructive feedback and show openness to feedback from others.	Providing feedback to the other teams on their presentation based on the rubric	The feedback is not related to the content or the format of the poster.	The feedback is brief, but it is based on the Poster rubrics' elements related to communication and research.	The detailed feedback is based on the Poster rubrics' elements related to communication and research, it mentions positive and negative aspects of the poster.	The detailed feedback is based on the Poster rubrics' elements related to communication and research, it mentions positive and negative aspects of the poster and it is constructive, suggesting solutions to make the other team's poster presentation better.	
Research	3.a. Develop research plan and gather the right tools and knowledge to complete their project	Research plan formulation	The methods are unclearly formulated, overly broad, or not effectively addressing the research topic.	The methods may require further refinement to effectively address the research topic.	The methods are relevant to the research question and demonstrate an understanding of the research area.	The methods are explained and highly specific, are relevant to address the question and show a deep understanding of the research area.	
	3.b. Critically evaluate research strategies, and if necessary, modify and adapt these strategies	Critical thinking on strategies, adaptability	Presentation and Q&A struggles with identifying problems, or struggles with finding solutions	Identifies scientific challenges to some extent, but limited solutions suggested, or missed some problems.	Presentation and Q&A demonstrate an understanding of problem and offers workable solutions.	Presentation identifies scientific challenges and solutions and provides insight on next steps. Q&A demonstrates excellent critical thinking on research strategy	
	3.i. Able to identify, integrate and analyse current knowledge about a topic including from multiple sources, perspectives and methodologies.	Understanding the knowledge	Presentation does not include integration of knowledge from various sources, perspectives, and methodologies.	Presentation combines knowledge from multiple sources and perspectives but lacks depth and sophistication.	Presentation demonstrates in-depth integration and analysis from various sources, perspectives, and methodologies.	Presentation excels in integration and knowledge analysis; Q&A showcases a deep understanding of the topic.
